End of Iteration Report

Summary of Completed Tasks

Task	Summary
Front end storyboarding	We used Xcode storyboards to modify the previous version of the app with the additional screens and adding necessary objects in the current storyboards
Adding bus stops to favourites	A key feature we wanted to implement was to allow the users to add their favourite stops.
Deleting favourite stops	Once the user adds their stop to favourites, the user would be able to delete the favourite stop
Adding multiple favourite stops	We decided that we wanted the user to add multiple favourite stops

Challenges faced

- Adding multiple favourite stops
- Deleting the favourite stop from the favourite list view
- Adding user defaults to allow stored favourite stops when app is relaunched
