Iteration 2- Pet Project Plan

<u>Marc and Sahib</u>

In this iteration as it was the start of our implementation towards a personalised BuzApp application, we decided to implement the features simultaneously. Our focus for this iteration was to start developing the new features of the personalised application. In this iteration we mainly focused on creating the favourites and recents features. This will be done by modifying the interface of the 2016/17 project to be able to include the new features.
